

Case Study

How xPeditite helped in reducing the S/4 HANA project timelines?

Discover how ToggleNow accelerated the conversion of S/4 HANA for one of our global clients.

Explore More →

It's our clients' voice..

We recently partnered with ToggleNow to expedite our SAP S/4 HANA conversion, and the results were nothing short of astounding. Their SAP Certified solution - xPedito proved to be the key to unlocking efficiency in our project.

We originally thought it will be a nine-month endeavour, which was completed in a mere three months!! Thanks to ToggleNow's innovative approach. The reduction in streamlined conversion process, and expert support they provided were instrumental in this remarkable achievement.

ToggleNow's xPedito solution not only saved us time but also significantly reduced costs, ensuring our business operations remained uninterrupted. This success has positioned us for growth and competitiveness in the digital landscape.

ToggleNow's expertise and commitment were evident throughout the project, and their innovative approach to SAP S/4 HANA conversion is unmatched. We highly recommend ToggleNow to any organization looking to expedite and simplify their SAP S/4 HANA conversion with certified and proven solutions.

 **A solution that can accelerate the role redesign & S/4 HANA conversion process**

Transaction Management

Analysis of transaction codes and Fiori Apps that are replaced in S/4 HANA automatically.

Fiori Apps

Create Fiori Apps for transaction codes to give your users a unified interface.

S/4 Role Validator

Analyze the existing roles to determine what needs to be changed. All with a single click.

Role Management

Create, change and manage roles efficiently and quickly with xPeditite Role Management.

FLP Management

Create Catalogs, Space IDs, Pages, Categories easily using FLP Management.

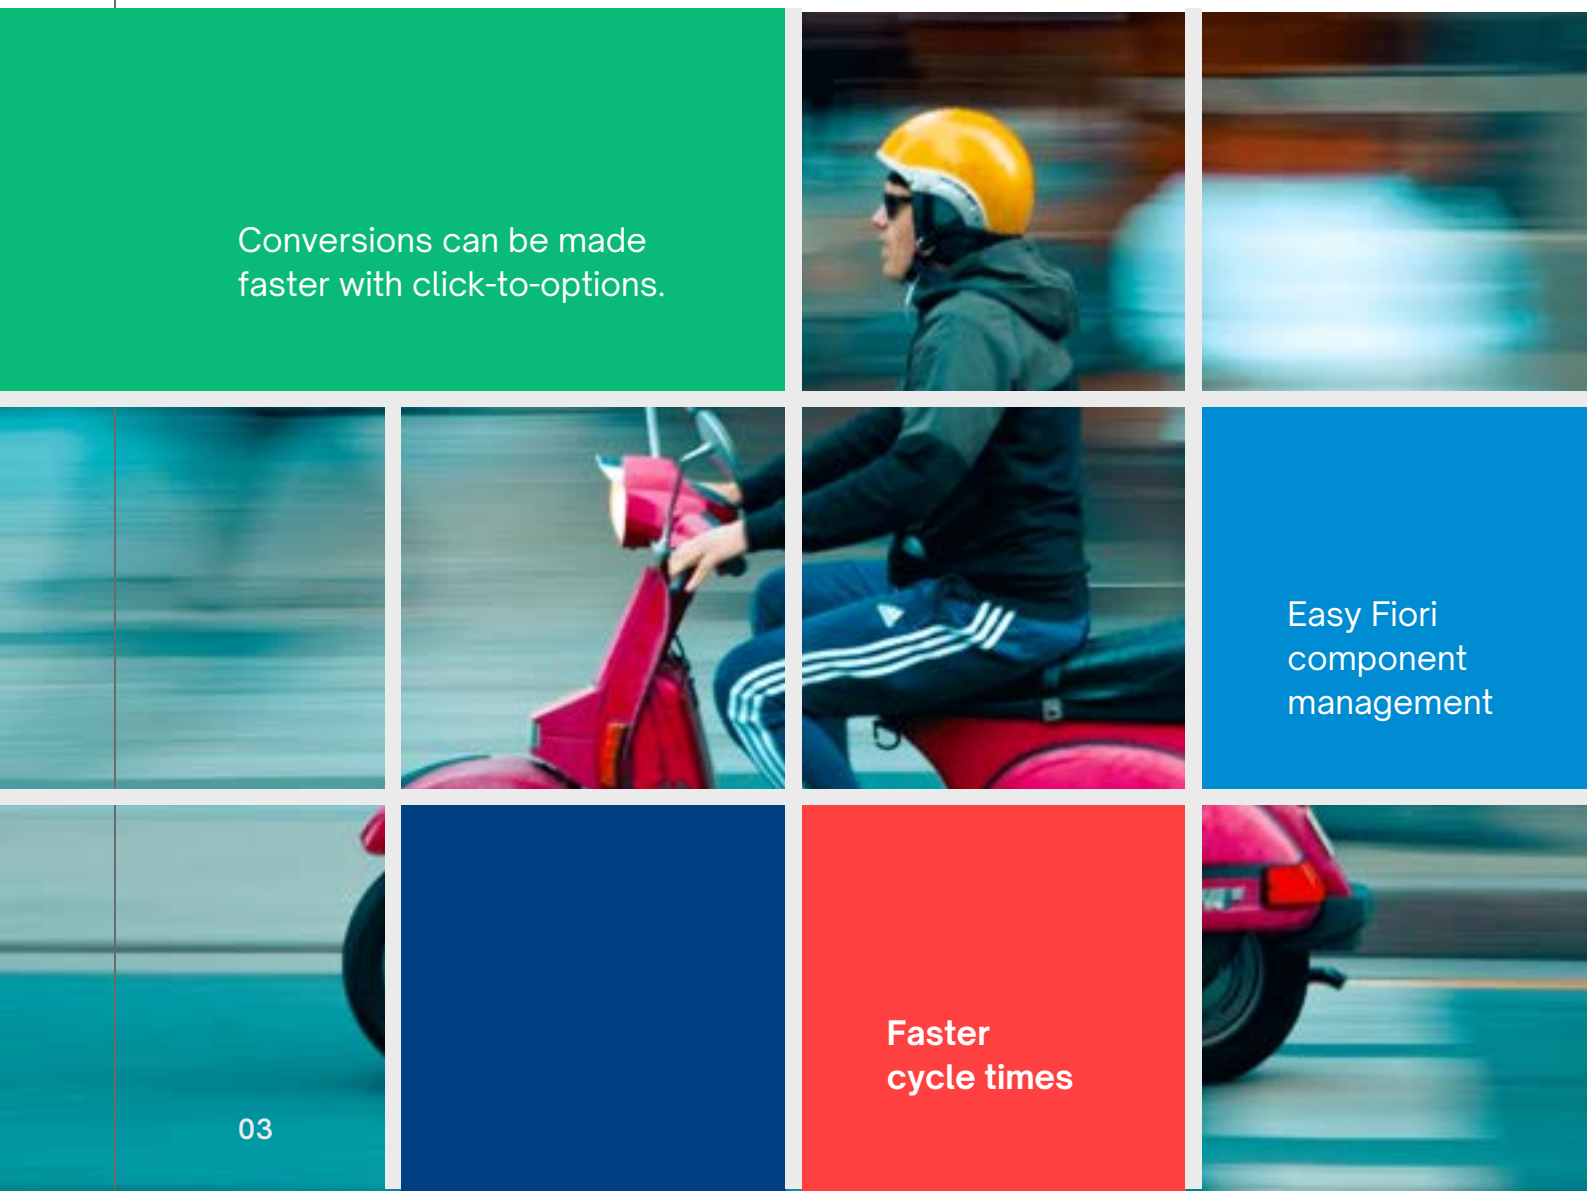

User Management

Replace roles easily now with various user management options.

Conversion Strategy

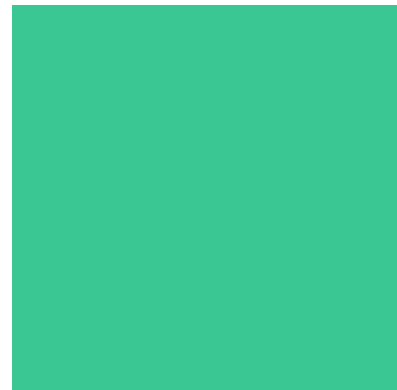

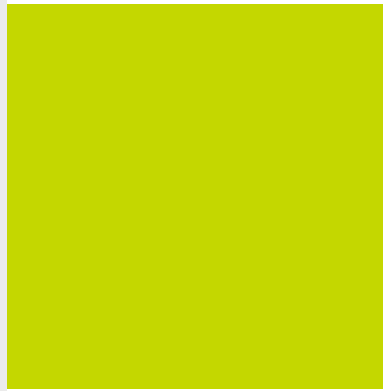

It can be challenging to convert authorization roles and profiles from SAP ECC to SAP S/4HANA due to the significant changes in the underlying data model and architecture. With SAP S/4HANA, data models are simplified, and various technological advancements are incorporated, including the use of HANA in-memory databases. Due to this evolution, certain ECC authorization objects and transactions may no longer be relevant in SAP S/4HANA.

Conversions can be made faster with click-to-options.

Easy Fiori component management

Faster cycle times

About the Project

The project involves converting existing roles to S/4 HANA roles. Our client also wants to create Fiori Apps for transaction codes to make it easier for users to access them.

Challenge & Solution

It is tedious to identify obsolete transaction codes, generate Business Partner authorizations, replace the existing transaction codes with Fiori Apps and Custom Apps, maintain authorizations, test and map roles to users.

As a result of other business priorities, our client wanted to accelerate the activity and chose ToggleNow's xPedit solution. It took us less than two months to complete this project using xPedit.

The following is a quick comparison between a manual process and the use of xPedit.

Our Approach

Value Proposition

xPedito delivered unparalleled value to our client by orchestrating a swift and accurate SAP S/4HANA authorization conversion in a mere two months. Our expert team, armed with comprehensive knowledge of SAP's authorization landscape, executed the migration seamlessly, achieving a remarkable 100% accuracy rate. Moreover, our agile methodology and customized solutions significantly slashed the project timelines, reducing them by a remarkable 80%.
