A COMPLETE

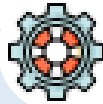

RISK ANALYSIS & MANAGEMENT SOLUTION

Verity is an automated, efficient, and lucrative solution that works as an add-on service to protect your SAP system. Compliance and risk analysis are crucial tasks that affect the working of many organizations. It is difficult to maintain numerous users and their authorization access in the system. The most effective shield against authorization risks and fraud is appropriate segregation of duties (SoD) and controlling access to sensitive information. **Verity** contains real time risk analysis capabilities, including object level management for the segregation of duties (SoD). The solution also provides easy and all round integration, from organizational security to configuration everything is covered. The ultimate aim is to resolve auditor's concerns about security leaks and compliance issues.

“Be compliant

Control compliance violations and improve audit performance.

 **Value Proposition**

Why VERITY?

- ✓ Cost effective as the solution is instigated over the existing SAP system
- ✓ Hassle-free and user friendly solution with easy reports
- ✓ Centralized compliance management with integrated reporting
- ✓ Accurate and efficient real-time functioning that allows security admin to control and reduce access risk
- ✓ Maintains compliance regulation act Sarbanes-Oxley and 8th EU Directive

Simple

- **Simple reports and easy management**, a 360° solution for the security team and auditors
- **Hassle-free and quick integration**, the solution can be used in just a few hours

Scalable

- **Highly configurable** and designed to adjust with changing risks and varying business dynamics
- Capable of managing full SAP structure
 - Rapid and **assured ROI**

Cost Effective

- **Cost effective** solution for compliance and risk control
 - Does not need any **additional infrastructure**
- **Pay less and gain more**, single solution for every process
